	Waters

Introducing the Shuttle range of boats, designed by KND Naval Design, a versatile and reliable range of passenger transport ferries suitable for a wide range of applications. Constructed from high-grade aluminium marine material and designed to meet Class rules relevant to the size of the boat, the Shuttle range ranges from 10m to 30m to cater to all passenger and cargo needs.

From inland waterways to offshore transport, the Shuttle range has been designed to withstand the toughest of environments and sea states, providing a safe and secure mode of transportation for passengers and cargo alike. The interior of the ferries can be fully customized to meet the unique needs of clients, ensuring maximum comfort and convenience for all.

Whether you require passenger transport for short or long distances, the Shuttle range of boats is the ideal choice. With a strong focus on safety, reliability, and efficiency, the Shuttle range is the ultimate solution for all your passenger transport needs. Choose Shuttle range, and experience unmatched performance and quality, guaranteed to exceed your expectations.
