

NAVAL DESIGN

P247 | SEASAYER 7.5

Length Overall	7.50m
Beam	2.80m
Hull Draught	0.4m
Main Propulsion	2 x 100 Bhp Outboard
Max. Speed	30 knots
Fuel Capacity	200 L
Crew & PAX	2 + 4
Classification	Grey Boat Code

Introducing our range of Seasaver ambulance boats, specially designed to provide emergency medical services in areas that are difficult to access by land-based vehicles. Our ambulance boats are equipped with state-of-the-art medical facilities and equipment, making them an ideal platform for providing life-saving medical assistance in remote and hard-to-reach locations. Our ambulance boats are suitable for a wide range of applications, including emergency medical response, disaster relief, and patient transport. They can be used in a variety of settings, including coastal regions, rivers, lakes, and other bodies of water. Investing in ambulance boats can provide governments with a number of important benefits. First, these boats can help to ensure that critical medical care is provided in areas that are inaccessible by traditional land-based vehicles. This can help to reduce response times and improve patient outcomes, particularly in emergencies. Ambulance boats can also be an important tool for disaster relief efforts, providing vital medical services to communities affected by natural disasters such as floods, hurricanes, and earthquakes. Additionally, these boats can be used to transport patients to and from remote areas, providing a safe and reliable means of transportation for those in need. Our ambulance boats are equipped with a range of medical facilities and equipment, including examination rooms, operating theaters, and patient cabins. The boats are staffed by qualified medical professionals, including doctors, nurses, and paramedics, who are trained to provide comprehensive medical care to patients in need.
