P626 | WASTE WARRIOR 27

| | |
|-----------------|-------------|
| Length Overall | 27.25m |
| Beam | 15.50m |
| Hull Draught | 0.90m |
| Main Propulsion | 2 x 433 Bhp |
| | Hydro Armor |
| Productivity | 10.8 t.hour |
| Fuel Capacity | 5000 L |
| Crew & PAX | 4 |
| Classification | BV |

Introducing the Waste Warrior 27 Pollution Control vessel, the ultimate solution for controlling pollution on the water. With a length overall of 27 meters, this vessel is designed to handle a wide range of pollution control tasks, from oil spill response to waste harvesting and disposal. One of the standout features of the Waste Warrior 27 is its ability to operate as a multi-function vessel. Equipped with advanced pollution control systems, this vessel is able to respond quickly and effectively to a wide range of pollution incidents, including oil spills, chemical spills, and other hazardous materials. For oil pollution response, the Waste Warrior 27 is fitted with a state-of-the-art Lamor Oil Skimmer, which is capable of recovering oil from the surface of the water at a rate of up to 400 m³/h. This allows for rapid containment and removal of oil spills, helping to minimize the impact on the environment and local communities. In addition to oil pollution control, the Waste Warrior 27 is also equipped for harvesting waste from the water. With a range of collection and storage systems, this vessel is able to efficiently collect, store, and dispose of waste materials, including plastics, debris, and other pollutants.
