## P272 | WASTE WARRIOR 8

Length Overall	7.90m
Beam	4.40m
Hull Draught	0.34m
Main Propulsion	1 x 50 Bhp OBM
Speed	7-10 knots
Fuel Capacity	50L
Crew & PAX	2
Classification	Grey Boat Code

Introducing the Waste Warrior 8 - the ultimate solution for pollution control in harbors, small bays, and lakes. Our pollution control boat is specifically designed to clean up water bodies and collect waste efficiently and effectively. The Waste Warrior 8 features a unique catamaran hull that channels the water and waste into a scoop bin, ensuring that all waste is collected and contained. The scoop bin is designed to hold a large volume of waste, allowing for extended periods of cleaning without the need for frequent offloading. Once the scoop bin is full, the waste is collected into bins that are easy to transport and offload onto shore. This makes the Waste Warrior 8 an ideal solution for cleaning up water bodies in a sustainable and environmentally friendly way. The Waste Warrior 8 is built with high-quality materials and advanced technology, ensuring durability, efficiency, and ease of use. Its compact size makes it easy to maneuver and operate in narrow waterways and confined spaces, making it an excellent choice for marinas and harbors. With the Waste Warrior 8, you can be assured that you are doing your part in keeping our waterways clean and healthy. Its innovative design and advanced technology make it the perfect tool for pollution control and waste management in harbors, small bays, and lakes.
